Research Projects

Style Transfer for Brand Personality — Published

Extended Neural Machine Translation and text style transfer approaches for evaluating the transfer between different levels of Excitement (a dimension of brand personality). Introduced additional loss functions to optimize style transfer approaches on the evaluation metrics. The long-term aim is to alter the level of multiple dimensions of brand personality simultaneously.

Online Diverse Recommendations — Ongoing

The aim of this project is to provide personalized, diversified and summarized recommendations using online learning algorithms. It also deals with devising ways for evaluating the algorithms.

Pattern Avoidance in Permutations — Bachelor Thesis

Guide: Prof. Benny George Kenkireth, Dept. of CSE, IIT Guwahati

Introduced a theorem and a conjecture to enumerate the distinct monotonically increasing or decreasing subsequence of length n+1 in a sequence of fixed length k.
